## 'WHERE PASSION MEETS PERFORMANCE'

### 8 STEP PUTTING PSR

Recently a 'PGA Event Announcer' commented on how much longer one of the leaders was taking for his 'Putting PSR' than he took for his 'Tee-Box and Fairway Shots'. "**Well I guess!**"

There is a lot more to do and we are threading a more readily recognized needle! Although I want to tell you that one should always '**Thread The Needle In Every Golf Shot**'. They are all to a '**Precise Quarter Sized Target**'. Right?

When we '**Visualize and PSR A Tee, Fairway or Approach Shot**' we should accomplish every step that we employ for the 'Putting and Chipping PSR' except, generally, 'Pacing Off The Shot'. The British will often pace their 'Approach Shots'. This above all, you 'MUST Know Your Yardages' before you pull the trigger!

Golf is just 'Distance and Direction'. Do NOT overlook either! Gather data so you can optimize your 'Probability Of Success' and happiness!

You should accomplish your '**Seven PSR Steps**' before ever executing your 'Putting and Chipping Procedures'. The 'Green Reading Components' include viewing **1) 'Mark Your Ball and Fix Two Ball Marks'**, **2) Read 'Down The Line'** ('DTL' for Break = 'Direction'), **3) Read 'Across The Line'** ('ATL' for Slope = 'Distance and Speed' ... '1/3 - 1/3 - 1/3'), **4) 'Survey Around The Cup'** to check for any peculiarities and 'Grain', **5) 'Up The Line'** ('UTL' to confirm the '**Break From The Slow End**' = 'Direction' ... 'Last 1/3<sup>rd</sup>'), **6) 'Pace'** to determine 'Measured Distance' and 'Energy Management' or 'Stroke Length' ('BHTD' - Inching - OSL) Remember you adjust for 'Slope'. **7) 'Final DTL'** to Refresh The Mental Image' and 'Intermediate Target'. Then 'Elevate Your Chemistry' and **8) 'Trigger Your Take-Away'**.

Once these 'Seven PSR Steps' are completed, your 'Data Base' will make you '**Comfortable**'. You have prepared like a pro. Some don't!

Back to the issue of this '**Taking More Time**'. Of course it does! When we accomplish 'Steps # 1 through Step #7, it takes time! '**ABOUT 8-10 SECONDS PER STEP!**' So a thorough 'Putting or Chipping PSR' may take about 50 to 65 seconds. 'Pace Of Play is OK With That!' We are immediately rewarded for our '**Diligence and Discipline**'! Never leave home without 'IT'!

'You Either Control Your Game Or It Will Control You'!
