'PERFORMANCE EXCELLENCE'

THROW-AWAY FROM THE BUNKER

'Throw-Away' is where the 'Clubhead Passes the Hands Through The Impact & Separation Zone'. There is no 'Pivot Lag Pressure'. You know that 'The 555 Team' is not in favour of what we refer to as a 'Flippy-Handed Delivery'. This method clearly presents a lot of 'Variables' and a reduced number of 'Constants'. Our 'Clubface Aim' control is suspect. 'Throw-Away' usually causes us to suffer from 'Deceleration' rather than solid 'Compression' with a reliable 'Line Of Compression'. Not a good thing!

We promote that you 'Set-Up' 'Square to Square' ... 'Square Clubface Aim' combined with a 'Square Alignment'. Don't cut the ball unless you need to do so. It adds risk!

Until you run out of 'Loft' that is provided by the club manufacturer, do not make any clubs more lofted by irregular 'Set-Up'. Until your 'Sand Wedge' ('56 Degrees Loft and 15% Bounce') is inadequate to get your ball over trouble or an obstacle, play it 'Square Square'.

We are more familiar with 'Square Square' than any other 'Set-Up' combination. Our entire 'Full Swing Bag' is accomplished 'Square Square'. Don't pull on 'Superman's Cape' ... flirting with added risk! He may retaliate ruthlessly?

Is 'Throw-Away' ever justified? We think so!

If you are in a grass or firm sand bunker, and want to stop your ball short with lots of 'Loft & Some Under Spin', you may want to help the 'Clubface Pass Under The South Pole of The Ball' with speed. A 'Flip-Handed' pass will contribute to this outcome, but beware of 'The Skullies'!

While we are on this topic of 'Bunker Work', remember that there are two primary 'Bunker Procedures' ... 1) The 'Thump Blast' ('Hit The Sand First') and 2) The 'Pick Chip'. ('Hit The Ball First') They are both terrific tools so perfect each! You shall be rewarded generously and, if your game is anything like mine ... be often blessed!

"Welcome Aboard!"
"Enjoy The Ride!"
