

# **555 Faults & Fixes**

## **'PERFORMANCE EXCELLENCE'**

### **OCULAR BAIL OUT**

We well understand the importance of 'Properly Functional Eyes'. Our 'Captain Eyes' run the 'Golf Club Machine or the "Golfing Ship'.

Without properly timed and constructed 'Orders From The Bridge', we shall get off course and may even 'Run Aground'.

The eyes gather about 85% to 90% of all the 'Brain Data' required to accomplish a solid golf strike.

Information gathered by the 'Eyes', the 'Hands' and the 'Feet' is transferred at just below the speed of electricity via 'Electro-Chemical Synapsis. to the brain center. There the data is processed at whatever rate we are able to handle. Individual rates vary.

The millisecond that we look away from our 'Information Target or Subject', we cease to gather and transmit any information to the 'Brain Computer Center'. The only message that is 'Subliminally and Autonomously' created and transmitted is one concerning 'Mutiny' and 'No One At The Helm'!

These are not good messages!

'Ocular Bail-Out' is a very weak behaviour in any 'Eye Hand Coordination' endeavour.

Enjoy looking right at the 'Bottom Inside Cheek Of The Ball' so that you have an optimal 'Probability Of Success'. ('POS')

Remember, 'It Is Your Parade'!

Those 'Baby Blues Are Boss'!

### **SATISFACTION GUARANTEED**
