

# 555 GOLF ACADEMY

**'PERFORMANCE EXCELLENCE'**

## 'SHORT GAME DRILLS'

### 'PSR TIME'

Recently a 'PGA Event Announcer' commented on how much longer one of the leaders was taking for his 'Putting PSR' than he took for his 'Tee-Box and Fairway Shots'. **"Well I guess!"**

There is a lot more to do and we are threading a more readily recognized needle! Although I want to tell you that one should always **'Thread The Needle In Every Golf Shot'**. They are all to a **'Precise Quarter Sized Target'**. Right? IF you do not agree or understand, write your '555 Team' 'FAST' and 'ASK US!' to explain further.

When we **'Visualize and PSR A Tee, Fairway or Approach Shot'** we should accomplish every step that we employ for the 'Putting and Chipping PSR' except, generally, 'Pacing Off The Shot'. The British will often pace their 'Approach Shots'. This above all, you **'MUST Know Your Yardages'** before you pull the trigger!

Golf is just 'Distance and Direction'. Do NOT overlook either! Gather data so you can optimize your success and happiness!

You should accomplish your **'Six PSR Steps'** before ever executing your 'Putting and Chipping Procedures'. The 'Green Reading Components' include viewing 1)Down The Line ('DTL' for Break = 'Direction'), 2)Across The Line ('ATL' for Slope = 'Distance and Speed'), 3)'Survey Around The Cup' to check for any peculiarities, 4)Up The Line ('UTL' to confirm the **'Break From The Slow End'** = 'Direction'), 5)'Pace' to determine 'Distance and Energy Management or 'Stroke Length ('BHTD') and 6)'Final DTL' to Refresh The Mental Image'.

Once these 'Six PSR Steps' are completed, your 'Data Base' will make you **'Comfortable'**. You have prepared like a pro. Some don't!

Back to the issue of this taking more time. Of course it does! When we accomplish 'Steps # 2 through #6, it take time! **'ABOUT TWO SECONDS PER STEP!'** So a twenty-footer may take about 80 seconds. But we are immediately rewarded for our 'Diligence'!

Never leave home without 'IT'!

## **SATISFACTION GUARANTEED**
