'PERFORMANCE EXCELLENCE'

CAMPFIRE LORE

Once you have your 'Putting Mechanics', your 'Pre Shot Routine' well in hand, your 'Distance & Direction', you shall be compelled to deal with 'Mother Natures'. Her elements matter!

'Grain', the 'Lean Of The Grass', is primarily a matter of draw towards the afternoon Sun. That is when it is the strongest. All the mythology about 'The Ball Breaks' towards the mountains, towards the valley, right at the freeway, towards the junction of the two rivers, towards the big bills in your wallet, is pure 'Campfire Lore' ... 'Bovine Scata'.

Again the #1 factor is the Sun's light source or trajectory across the afternoon sky. Locate the 'Top Of The Arc' ('The Parabola') and that is where the grass grows. That is where your grain shall be. (see 'The Ragged Edge Of The Cup')

Other natural factors are length, moisture content, species of grass (POA, Bermuda, Rye, Blue, St. Augustine and more), Clutter or Diritis, Wind Direction & Velocity, Mower Pattern, whether the greens keepers roll post cut or not and more.

Enjoy intimacy with this 'Green Reading Art Form'! This mistress shall bring you happiness if you treat her properly!

If not, it's your parade and poison!

"Welcome Aboard!"
"Enjoy The Ride!"
