'PERFORMANCE EXCELLENCE'

BULLET-PROOF DRILLS **The Tee Path Drill**

You all know what your 'Intermediate Target' ('I/T') is ... the tee in the ground between 10 and 15 inches in front of your ball. If you can take it out with the 'Sweet Spot' of your 'Clubhead', you shall be a 'Happy Golfer', especially if your 'Grip' has been carefully designed and then properly applied with an appropriate amount of 'Grip Pressure' through 'Impact & Separation'. Remember, your 'Target or Swing Hand' controls the 'Clubface Aim'. It takes the 'Lag Out' and 'Monitors Velocity'. (see 'Closure Rate')

What can we do to prove that our 'Clubhead Path' is correct?

Place three more tees on each side of the 'Target Line' starting about 3 inches to 'Low and High Energy Side' and placing them about an inch apart moving away from the 'Target Line' at 90 degrees.

When you make your pass through the ball, if you are 'Outside-In' ('Fade-Pull Path'), you will take out one or more of the 'Low Energy Side Tees'. If you are 'Inside-Out' ('Draw-Push Path') you will take out one or more of the 'High Energy Tees'.

This is a 'Seeing Is Believing Drill' ... instant feedback is a good thing.

Use it well!

"Welcome Aboard!"
"Enjoy The Ride!"
