

555 GOLF EDITORIALS

'PERFORMANCE EXCELLENCE'

THE FEWEST MOVING PARTS

I guess we must write the simplest messages we can conjure up as often as possible. That is easier said than done. All our 'Editorials', 'Tips', 'Articles' and everything that is a short message is supposed to fit comfortably on one page. Our 'Header & Footer' ('Top & Bottom') take up 1/3rd of a page. That leaves a maximum of 2/3rds for the message in 'Times New Roman 12 pitch ... usually adequate and keeps it to the point.

We are best served with a simplistic procedure that requires the least amount of moving parts. Hence, our 'Putting Stage 1 Procedure' is that in spades. No stroke procedure is even close to the simplicity of our 'Putting Stroke'. With a 'Hovering Clubhead Sole', the properly 'Set-Up Quiet Stable Sweeping Triangles' are powered by the bigger muscles of the 'Brace Shoulder'. The 'Breathing Out' short 'Back & Up Swing' is accomplished by the 'End Pad Of The Brace Middle Finger'. After an "&" 'Transition', still 'Breathing Out', gravity starts the 'Down & Out Swing', followed by a 'Pushing Motion of the 'Brace Palm "X" in the 'Bottom Half Of The Swing Circle'. This produces the 'Impact, Chase, Follow, Finish and Hold', through the 'Intermediate Target' and not at the ball.

The '555 Team' has often written that 'I Drive As I Putt'.

Absolutely true ... thinking about 'The 5 Set-Ups' and 'The 5 Essential Elements' is key!

Now you figure out the common parts and procedures. The differences shall be rather obvious!

Simpler than you think!

"Welcome Aboard!"
"Enjoy The Ride!"
