## **‘WHERE PASSION MEETS PERFORMANCE’**

### **THE ‘VERY SIMPLEST’ DRILL**

This Drill is designed to get the ‘FEEL’ for the ‘WEIGHT of the GREENS’. We each need to become accustomed to how fast the greens are at each location. We should be told what ‘STIMP’ they are and the Greens Superintendent should insure uniformity of ‘Speed’ throughout the entire course. It does not always happen that way!

You require three (3) to six (6) high-quality playing Balls and your Putter.

Stand gently-footed in the body of the green and make three putts to the fringe at different Distances. ‘FEEL the Stroke Length’ or ‘Weight and Thrust’ required to move the Ball precisely to a gentle touch or contact with the fringe.

Do this for five to ten minutes from different locations to various fringe points.

You may do this Drill from the Fringe to a point in the Body of the Green as well. A way to accomplish this method is to make one Putt and then make your second five feet farther and the third again five feet farther. You can use four Balls if you so desire so one becomes the ‘Target BALL’.

You will soon know how this specific green ‘Rolls’ and hope that the rest are the same.

Remember the ‘FEEL’.

‘Remembered FEEL’!

**“Welcome Aboard!”**  
**“Enjoy The Ride!”**

### **SATISFACTION GUARANTEED**
