

# 555 GOLF EDITORIALS

**'PERFORMANCE EXCELLENCE'**

## **GOLF CLUB SPECIFICATIONS LENGTH, LOFT, LIE**

Generally Steel Shaft Specifications (D-1 to D-4 ... Men's Driver @ 43")  
Generally Composite Shaft Specifications (D-1 to D-4 ... Men's Driver @ 44")  
Add 1" for Composite Shafts to accomplish comparable 'Swing & Dead Weights'.  
These numbers directly depend upon 'Component Dead Weights'.  
In a quality 'Custom FM Set', these items must be 'Matching' across the set.  
For example, all the 'Grips' must have the same 'Gram Dead Weights'.  
For example, all the 'Clubheads' must have precisely 'Progressive Gram Weights'.  
In a quality 'Custom FM Set', these items and capabilities must be 'On Progression'.  
If 'Components' are not 'Consistently Progressive', the set is degraded.

Remember, a 'Custom Built Golf Clubs' cost little or no more than a mediocre set.

You really deserve a 'Custom Set'!

Most golfers have no idea what the 'Industry Average Club Specs' really are. Hope you enjoy having this information reference from your '555 Team'. Contact us if you have any questions.

Always here to help!

Enjoy!

	CLUB	LENGTH	LOFT	LIE	DISTANCE
